

Practical Math

Instructor: Codie Hill

Grade: 4th – 6th

Full Year Course

Fees: \$30 monthly tuition fee plus \$15 material fee per semester

Text: None

Course Description:

We will be learning about how we really do use math in our everyday life by stepping out of a workbook and taking a more hands-on approach. We will cover addition, subtraction, multiplication, division, decimals, fractions, and learn how to budget and why it is important. Each week will consist of learning a new topic and an activity to follow. "Bonus work" will be sent home each week for those who choose to review at home.
