

## **Earth Science**

**Instructor:** Robbie Wilson

**Grade:** 9<sup>th</sup> – 12<sup>th</sup>

**Fees:** \$40 monthly tuition fee plus one-time \$50 lab/material fee

**Text:** Earth Science 4<sup>th</sup> Edition; ISBN: 978-1-60682-070-4

### **Course Description:**

-In this course, students will find that Earth science is also a battle of worldviews. This text clearly introduces students to the secular theories of earth science and also critiques these theories. For each secular theory, the text affirms the conservative biblical view of Earth's history shaped by Creation, the Fall, and the Flood. Students' Christian worldviews will be shaped and strengthened as they learn about tectonic processes, landforms and earth materials, fossils, the oceans and oceanography, rivers and lakes, the atmosphere, weather and storms, climate and environmentalism, the solar system, the universe and cosmology, and space science.

-This course will require a notebook or spiral for taking notes. Lab reports will be due the week after the lab experiments are performed. Students are expected to do independent work outside of class to stay up to speed. Study guides and handouts will be provided to detail specific topics for students to focus on to adequately prepare for class exams.
